Re: Work Experience Opportunities

Dear Andy,

I would just like to say a big thank you for giving one of our clients the opportunity to gain some meaningful work experience within the building trade.

Mind in Croydon Employment & Social Inclusion Services aim to provide support and advice for individuals wishing to access the world of work, education and leisure. Our main objective is to significantly improve opportunities and outcomes for people with mental health problems by challenging attitudes and eliminating barriers to employment and social participation.

Many people with mental health problems can work given the right opportunities and support. We hope that A & J City Ltd will set an example for other mainstream employers to consider taking on people with mental health problems, giving them the opportunity to achieve their goals, feel included in society and make a real difference.

Thank you for your support

Yours sincerely,

Peter Phillips

Employment & Social Inclusion Services Manager
